In-person event

ABOUT THIS EVENT

The Boston User Group is getting together on **September 15th at 6pm!** Join us for an opportunity to hear from other Snowflake users in the area, grow your professional network, ask questions, and get details on our next meeting.

During this meeting David Garrison, current Data Superhero and guest speaker at Snowflake Summit, will share his experience building a low-latency data warehouse including lessons learned, and the product achieved using Snowflake's unique architecture. He'll explore self-healing, incremental pipelines built in DBT and Azure Data Factory, and the Snowflake tools utilized (including Snowpipes, semi-structured data, streams and tasks, and external functions). David will leave you with takeaways on how to integrate Snowflake with other ETL and database tools, scale using incremental loads, and take advantage of Snowflake's capabilities. Please register to join us!

AGENDA

6:00pm | Meeting Kickoff

6:20pm | Welcome Remarks

6:30pm | Lessons Learned Building a Low-Latency Data Warehouse

7:10pm | Questions & Answers

7:30pm | Announcements & Networking

8:00pm | Meeting Close

SPEAKER

David Garrison

Independent

Data Engineer & Snowflake Data Superhero

David Garrison (he/they) has been wrangling data since 2012. In that time, his career has spanned such diverse industries as international trade regulations, Bible software, mobile games, and insurance quotes. He's worked with Snowflake for 3 years and is a member of the Snowflake Data Superheroes. He enjoys recreational mathematics, hucking discs, playing board games, and esports.
